

1984 is Happening Now – Part Nine

*Plainly the thesis is that history must now continue to be a string of accidents with an increasingly disastrous trend until a comprehensive faith in the modernized World-State, socialistic, cosmopolitan and creative, takes hold of the human imagination.*  
—*The Shape of Things to Come* by H. G. Wells, 1933

The following excerpts of *1984* deal with developments that have been actualized but never divulged to the public, though some of us may understand that they are indeed in place. *1984* passages are italicized. My comments follow.

*The scientist of today is either a mixture of psychologist and inquisitor, studying with real ordinary minuteness the meaning of facial expressions, gestures, and tones of voice, and testing the truth-producing effects of drugs, shock therapy, hypnosis, and physical torture; or he is chemist, physicist, or biologist concerned only with such branches of his special subject as are relevant to the taking of life.*

Iris scans, voice stress technologies, all are designed to assess your behavior. One day they will be admitted into the adjudication of criminal cases. Physical torture is now being promoted in the United States as a viable method of interrogation. What we don't realize is that this is a desensitizing technique to manipulate us to accept its legitimacy for the time it is turned on us. And has it not been demonstrated that science has killed more than it has cured?

*Some [scientists] are concerned simply with planning the logistics of future wars; others devise larger and larger rocket bombs, more and more powerful explosives, and more and more impenetrable armour-plating; others search for new and deadlier gases, or for soluble poisons capable of being produced in such quantities as to destroy the vegetation of whole continents, or for breeds of disease germs immunized against all possible antibodies; others strive to produce a vehicle that shall bore its way under the soil . . . others explore even remoter possibilities such as focusing the sun's rays through lenses suspended thousands of kilometres away in space, or producing artificial earthquakes and tidal waves by tapping the heat at the earth's centre.*

Let's itemize:

*Devise larger and larger rocket bombs.*

Nuclear missile systems.

*For soluble poisons in such quantities as to destroy the vegetation of whole continents.*

Poisons such as bioweaponry and defoliants like Agent Orange.

*Or for breeds of disease germs immunized against all possible antibodies.*

Legionnaire's Disease, AIDS, Ebola, West Nile Virus, SAARS, Avian Flu, Anthrax, all "cooked" pathogens that have been tested on the American people without their knowing it and have been, or are being, or will be released as "natural-occurring" plagues.

*Others strive to produce a vehicle that shall bore its way under the soil.*

Though a topic considered by many to be an urban legend, giant tunneling machines are very much a reality and, reportedly, have been employed in the Rocky Mountain West, most

precisely, the state of Colorado to create an underground infrastructure impervious to nuclear attack.

Why Colorado?

Because Denver will become the capitol of the 34-nation American Union after the District of Columbia is rendered uninhabitable by a nuclear detonation. This will mark the end of our population's connection with the Constitutional republic known as the United States.

*Others explore even remoter possibilities such as focusing the sun's rays through lenses suspended thousands of kilometres away in space.*

The High Frequency Active Auroral Research Program (<http://www.haarp.alaska.edu>) and Star Wars technology—much of which has been implemented but kept secret—have weaponized the atmosphere and negatively impacted our environment.

*Or producing artificial earthquakes and tidal waves by tapping the heat at the earth's centre.*

The “Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques” held in Geneva, Switzerland, May 1977, stated the following: “It is the understanding of the Committee that the following examples are illustrative of phenomena that could be caused by the use of environmental modification techniques as defined in Article II of the Convention: *earthquakes, tsunamis* [italics my emphasis]; an upset in the ecological balance of a region; changes in weather patterns (clouds, precipitation, cyclones of various types and tornadic storms); changes in climate patterns; changes in ocean currents; changes in the state of the ozone layer; and changes in the state of the ionosphere.”

By 1977, at the latest, the capability to create natural disasters was possible. Is this what caused the tsunami that devastated parts of Southeast Asia?

*During this time rockets loaded with atomic bombs can be assembled at all the strategic spots; finally they will all be fired simultaneously, with effects so devastating as to make retaliation impossible.*

As we all know, Intercontinental Ballistic Missiles are a reality.

I'll close this column and the series with two apropos statements written to me by Paul Sandhu, a Canadian bible scholar and listener to my radio program. Sandhu succinctly sums up Orwell and what might be considered his greatest work:

“1984 may hardly be classified as a work of fiction. Some of that which he wrote is historical, and some of his writing is prophetic. He was very accurate in terms of things that were coming and now seem to be upon us. To say that the world he describes is “bleak” would be the understatement of the year.

“Outside of the Bible, this essay is the most amazing document on human government and the human condition that I've ever read . . . Prophet or inside information?”
