

Avian Flu is for the Birds

The paranoia drum has been beaten for months now about the onset of the Great Pandemic: The Bird Flu From Hell.

This is yet another globalist-planned freakout to drive the masses to get vaccinated with dirty serums manufactured by the globalists' corporations.

What a business plan, eh?

The elites ran this same freakout on us in 2003. Remember the SARS scourge?

Most of us forgot that, didn't we? And SARS didn't do squat.

But here we go again, getting all wrapped around the axle about the New Black Plague soon to descend upon us.

Don't you get it? The mass media freakout machines spit out propaganda to coerce us to run unquestioningly wherever they tell us to.

That's why these cretins run the same scam—with a little different twist here and there—over and over again. It's because we have a short memory, lack critical thinking skills, and don't take the time to step back from our Chicken Little panic to do any research or, at the least, conduct any discussions with others who still possess a brain that functions despite a lifetime ingestion of fluoride and aluminum and pharmaceuticals.

Once again, the corporate-owned media does the fear-mongering and pharmaceutical promotion, and the masses get in line, sleeves rolled up, just palpatingly relieved they got injected with the one of those precious few doses of vaccine.

In years gone by, I've gotten into it with readers of this newspaper who believed vaccines were the greatest medical discovery of all-time.

Vaccines are a myth. We presume they are effective because we were told they were. Our doctors love vaccines because that saves them from having to do any in-depth analysis of both the creation and the cure of any disease.

Find one bona fide study of positive vaccination efficacy. Just one.

As long as these charlatan physicians can throw medications at us, they're happy, Big Pharma is happy, were happy, and life goes along as if everything is fine.

But everything isn't fine. We are not cured of anything. We just think we are.

Then, finally, when our body filters can't take the medical poisons any longer, they start to fail on us, and we think we're dying of some complication from the original problem that really never went away because the poisons mask symptoms but don't cure.

How many folks, however, could've cured their problems through diet, exercise, supplements, and a lifestyle change that was long needed.

But, in today's world of convenience at any cost, the silver bullet cure is the drugs.

And, so, here we are on the brink of a pandemic flu, tales of which have likened it to the killer 1918 Spanish Flu. Everyone is being prepared for the New Black Plague, but the only beneficiaries of the vaccines are the pharmaceutical companies.

"Finally, the pieces of the puzzle start to add up," writes Dr. Joseph Mercola, (www.mercola.com) author of the *Total Health Program*. "President Bush sought to instill panic in this country by telling us a minimum of 200,000 people will die from the avian flu pandemic but it could be as bad as 2 million deaths in this country alone.

"This hoax is then used to justify the immediate purchase of 80 million doses of Tamiflu, a worthless drug that in no way shape or form treats the avian flu, but only

decreases the amount of days one is sick and can actually contribute to the virus having more lethal mutations.”

And guess who will be one of the really big winners?

None other than Secretary of Defense Donald Rumsfeld, a former chairman of Gilead—the manufacturer of Tamiflu—who stands to make big profits as an ongoing shareholder.

And a final word regarding the 1918 Spanish Flu:

Eleanor McBean, who has written several books on vaccinations, has another coming out entitled *Vaccination Condemned*, in which recalls living through the 1918 Flu:

“Practically the entire population had been injected—“seeded”—with a dozen or more diseases (?) or toxic serums. When all those doctor-made diseases started breaking out all at once, it was tragic.

“That pandemic dragged on for two years, kept alive with the addition of more poison drugs administered by the doctors who tried to suppress the symptoms. As far as I could find out, the flu hit only the vaccinated. Those who had refused the shots escaped the flu. My family had refused all the vaccinations so we remained well all the time. We knew from the health teachings of Graham, Trail, Tilden and others: that people cannot contaminate the body with poisons without causing disease.

“We [who didn't take vaccines] seemed to be the only family which didn't get the flu; so my parents went from house to house doing what they could to look after the sick, as it was impossible to get a doctor then. If it were possible for germs, bacteria, virus, or bacilli to cause disease, they had plenty of opportunity to attack my parents when they were spending many hours a day in the sick rooms. But they didn't get the flu and they didn't bring any germs home to attack us children and cause anything. None of our family had the flu . . . not even a sniffle . . . and it was in the winter with deep snow on the ground.

“It has been said that the 1918 flu epidemic killed 20,000,000 people throughout the world. But, actually, the doctors killed them with their crude and deadly treatments and drugs. This is a harsh accusation but it is nevertheless true, judging by the success of the drugless doctors in comparison with that of the medical doctors.

“If the medical doctors had been as advanced as the drugless doctors, there would not have been those 20 million deaths from the medical flu treatment.”
